Bluesky: @OBardagot

Profile

Passionate young group leader with 10+ years of experience in organic electronics. Physico-chemist, expert in semiconductor doping. Dedicated mentor. Fluent in French and English with excellent writing and oral skills. Esteemed (inter)national network of collaborators.

Languages

French	Mother tongue
English	C2 - Fluent
German	B1
Spanish	B1

Computing

Python, LabVIEW, Density Functional Theory, C++

OriginLab, Igor, Zotero, ChemOffice, MestReNova, WSxM, Topspin

Olivier Bardagot

Group Leader at ICPEES - CNRS Strasbourg

Experience

Chargé de Recherche CNRS | *Since 01/02/2023 – current position*
French National Centre for Scientific Research (CNRS), Strasbourg, France

- **Tenured associate professor** at ICPEES (UMR 7515): research activities focused on the optimization of organic electrochemical transistors (OECTs) thanks to polymer engineering. Innovative biosensors for water quality monitoring and early diagnosis of diseases are under development.

Researcher assistant | *01/04/2023 –31/03/2025*
"Wissenschaft Mitarbeiter IV", 20% part-time
University of Bern, Bern, Switzerland – Prof. Natalie Banerji

Post-doctoral Research Associate | *01/01/2020 – 31/01/2023*
University of Bern, Bern, Switzerland – Prof. Natalie Banerji

- Time-resolved spectroscopy and semiconducting polymer doping

PhD – with Committee Praise | *Defended on 15/10/2019*
Université Grenoble Alpes (UGA), Alternative Energies and Atomic Energy Commission (CEA) Grenoble, France | 15/10/2016 – 14/10/2019

- **N-type organic semiconductors for energy conversion**: Organic chemistry, Polymer science, Organic photovoltaics (OPV) and thermoelectricity (OTE), doping mechanism, organic field-effect transistors (OFETs), microstructure characterization, DFT modeling

Teaching | *2016 – ongoing*
Organic electronics (MSc 2 lectures, ECPM Strasbourg), **Quantum chemistry** (BSc 2 lectures, University of Bern), **Physical chemistry** of aqueous solutions (BSc 2 practical, UGA), **Organic chemistry** (BSc 1 tutorial, Grenoble INP), **Polymer-based solar cells** (PhD/postdoc practical, CEA Grenoble)

Research internship | *01/12/2015 – 01/06/2016*
Imperial College London, Centre for Plastic Electronics, London, UK

- Zone-casting of semiconducting polymers for OFETs and OPVs

Research internship | *01/06/2015 – 01/09/2015*
Central Research Institute of Electric Power Industry, Tokyo, Japan

- Development of organic light-emitting electrochemical cells (LECs)

Education

Imperial College International Diploma – first class honors
Imperial College London, Department of Physics, UK | 2015 – 2016

MSc in Physics and Nanoscience Engineering – first class honors
Grenoble Institute of Technology Phelma (INP), France | 2013 – 2016

KEYWORDS

Polymer science; Organic mixed ionic-electronic conductor (OMIEC); Organic electrochemical transistor (OECT); Doping mechanism; Organic thermoelectricity and photovoltaics (OTE/OPV).

RESEARCH OBJECTIVE

The research objective of my team is to **control the macroscale and nanoscale morphologies** of organic **semiconducting polymer thin films** to develop **functional**, **cost-efficient**, **portable**, and **environmentally friendly** organic electronic devices. The group aims to optimize **organic electrochemical transistors (OECTs)** with a view to providing a new generation of biosensors for rapid, accurate, selective, on-site, and low-cost quantification of pollutants and bacterial contamination to identify water drinkability (UN Goal 6) and to achieve early diagnosis of neuropathologies (UN Goal 3). To achieve these goals, the group elaborates **new highly structured polymer films** with a focus on understanding the **fundamental mechanisms** driving their chemical and electrochemical **doping**. We are combining a wide range of **microscopy** techniques with ***in-operando*** **advanced spectroscopic** and **electrical characterization techniques** to rationally guide **molecular** and **device engineering**. To carry out this highly **interdisciplinary research,** the group is collaborating with internationally renowned (i) **chemists** to provide state-of-the-art performing polymers tailored to answer our research questions, (ii) **physico-chemists** to access top-notch characterization instruments to clarify specific questions with pinpoint accuracy, and (iii) **biologists** to valorize our findings and move up the Technology Readiness Level scale by developing functional biosensors.

MENTORING

- **4 ongoing PhD students** under my supervision (2 ♀/1 ♂: in France: Wissal Errafi and Alessandra Pistillo (defense expected in 2027), and Martin Hilt (defense expected in 2028), 1 ♂ in Switzerland: Basil Hunger (defense expected in 2027)
- **7 Master students** graduated under my supervision (5 ♀ / 2 ♂: Wissal Errafi, Alessandra Pistillo, Richard Bomba and Linda Bejaoui in 2024, Stella Schuster and Chimène Abassi in 2025, Martin Hilt in 2026)
- **4 PhD thesis** juries since 2025 (3 ♀: May Ourabi supervised by B. Lessard in Canada, Lize Bynens supervised by W. Maes in Belgium, Reem El Attar supervised by M. Abbas and D. Thuau in France, and 1 ♂: Elias Makhoul supervised by O. Simonetti in France)
- **5 PhD** monitoring panels (2 ♀ / 3 ♂ in France)

AWARDS

June 2026 Junior Researcher Award from the Energy Cross-Disciplinary Division of the French Chemical Society (Société Chimique de France, SCF).

April 2024 Prize of the Materials Horizons journal (RSC) at the international conference SPIE 2024 for "his exceptional contribution to the Women in Renewable Energy workshop".

GRANTS AS COORDINATOR – TOTAL = 333'412 €

2025 **24'000 €** – MITI Réseaux de capteurs, GlySens project: "Capteurs organiques pour le suivi continu de la concentration de glyphosate dans les eaux de surface".

2024-2028 **240'412 €** – ANR JCJC, young researcher national grant, CAROT project: "Controlled anisotropy for transistors with record-breaking performance".

2024 **14'000 €** – PEPS Energie CNRS grant, PoroTOP project.

2023-2025 **55'000 €** – Attractivité IdEx, University of Strasbourg grant, MAESTRO.

GRANTS AS PARTNER – TOTAL = 950'286 €

2026-2031 **458'193€** – ANR PRME, MARBRE project, coordinated by N. Leclerc (ICPEES)

2026-2030 **104'865€** – ANR PRCI Germany-France, ThermoNano project, coordinated by M. Kemerink (Uni Heidelberg, Germany)

2025-2028 **197'576 €** – ANR PRC, SMOOTH project, coordinated by O. Simonetti (Uni Reims)

2024-2027 **189'652 €** – ANR PRC, TriPODE project, coordinated by S. Méry (IPCMS, Strasbourg)

PANELS AND BOARDS

Since 2026 International project reviewing: Reviewer for the Dutch Research Council and the Israeli Ministry of Innovation, Science and Technology

May 2026 Panel member to hire an Associate Professor in Analytical Chemistry at the University of Strasbourg

Since 2025 Steering committee of the international conference SPIE Optics + Photonics, Physical Chemistry of Semiconductor Materials and Interfaces symposium, San Diego (USA)

Since 2024 Steering committee of the international conference Neuromorphic Organic Devices, and co-organizer of the NOD2024 edition in Paris

Nov 2024 Co-organizer of the international conference MATSUS Fall Meeting – Organic Mixed Ionic-Electronic Conductors symposium in Lausanne, Switzerland

Since 2021 Review editor for Thermoelectric Materials of Frontiers in Electronic Materials

Since 2021 Reviewer for Advanced Materials (IF = 26.8), Advanced Energy Materials (IF = 26.0), Nature Chemistry (IF = 20.2), JACS (IF = 15.7), Science Advances (IF = 12.5), ACS Materials Letter (IF = 8.7), Macromolecules (IF = 5.2), Journal of Materials Chemistry C (IF = 5.1), The Journal of Physical Chemistry Letters (IF =4.6), Applied Spectroscopy (IF = 2.2), etc (source: ORCID).

PUBLICATIONS – 25 RESEARCH ARTICLES (+ 4 UNDER REVISION)

1. *Key parameters for reliable biosensing using organic photoelectrochemical transistors: a case study on bilirubin detection*, W. Errafi*, S. Schuster*, M. Rahmani, A. Pistillo, P. Carrascal Marquez, N. Zimmermann, N. Leclerc, T. Cottineau*, **O. Bardagot***, *Journal of Materials Chemistry C* **2026**, *n/a*, n/a - (special 2027 Emerging Investigators issue)

2. *Roadmap for neuromorphic organic devices,* M. Di Lauro, F. Alibart, **O. Bardagot**, P. Belleri, M. Benwadih, A. Benyahia, L. Bongartz, A. J. Boys, U. Bruno, M. Caironi, M. I. Ceballos Hernández, V. Criscuolo, S. Danthon, G. Darbandy, A. De Salvo, M. D. Dickey, S. V. El Nakouzi, S. Fabiano, M. Fattori, E. Feltri, D. Gallaire, E. Gerente, P. Gkoupidenis, A. Handelman, M. Ienca, S. Inal, B. Iniguez, E. Ismailova, L. Kadura, R. Kantelberg, S. Kashani, S. T. Keene, Y. Kim, H. Kleemann, E. J. W. List Kratochvil, I. Krauhausen, Z. Li, G. Ligorio, N. Lobato-Dauzier, A. Luzio, C. D. Matthus, T. Meier, A. Offenhaeusser, S. Paul, N. Prudnikov, V. Rincon Montes, F. Santoro, W. Shan, A. Solgi, E. T. Teka, L. Teuerle, W.-T. Ting, F. Torricelli, L. Tournon, Y. van de Burgt, Y. Wang, Y. Yoon, A. Zaibi, D. Zucchelli, L. E. Calvet, *Neuromorph. Comput. Eng.* **2026**, *6*, 032501

3. *Role of structure and charge trapping on the bipolaron formation and magnetic-field response of gated conjugated polymers,* Z. Yang, V. Lemaur, M. Berteau-Rainville, **O. Bardagot**, Y. Olivier, E. Orgiu, https://arxiv.org/abs/2605.30196v1 (accessed 6 June 2026), **2026** – submitted to Nature Materials

4. *High-Performance n-Type Organic Thermoelectrics Enabled by Control Over Microstructure, Orientation and Contact Plane in Naphthalenediimide-Bithiazole-Copolymer Films*, S. Wang, S. Oummouch, H. Wei, K. Thorley, A. Marks, A. Magni, X. Sun, A. Pistillo, B. Schmaltz, **O. Bardagot**, S. Ludwigs, A. Salleo, Y. Hu, M. Brinkmann, *Advanced Functional Materials* **2026**, e77341

5. *Resistance to Overdoping Allows Over 2000 S cm^{-1} Conductivity in P(g$_3$BTTT) With Anion-Exchange Doping*, B. Hunger, M. M. Horn, E. Röck, D. R. Villalva, L. Bynens, J. Vanderspikken, C. FAIR AND HEALTHY SCIENCE

March 2026 **Interview for** "**ELLES nous inspirent**", organized by le Jardin des Sciences (Strasbourg). YouTube video: L'égalité professionnelle est l'affaire de tous et toutes

Since 2026 Co-manager of the **Egal'ITI** team of the ITI HiFunMat (Strasbourg)

2024-2026 Contribution to Global Women's Breakfasts (IUPAC) and la science taille XX elles

Since 2023 Referent for **gender equality** at ICPEES

I am volunteering to humbly contribute to the transition towards **professional equality**, a role aligned with UN Sustainable Development Goal 5. Our mission is to promote equality in the workplace, provide information, and combat all forms of discrimination. In concrete terms, I collect and relay testimonies of moral and/or sexual harassment to the CNRS national alert unit, which then carries out a legal investigation and provides psychological support. Every two weeks, I lead a compulsory ten-minute training session for all new staff hired, with two main objectives: (i) raise awareness of the reasons for and consequences of inequality in the workplace, and (ii) inform them of the procedure in case of discrimination or harassment. These efforts help to combat unconscious bias, put an end to inappropriate behavior in the workplace, and encourage institutional change to support a fairer, healthier, and more innovative research environment.

OUTREACH

June 2026 **Citizen science:** Co-organisation of the 1st edition of *En-quête de savoirs* with OPUS (Unistra), an event bringing together citizens and researchers of HiFunMat

July 2025 **Press release:** How does our research at STELORG (ICPEES/ICS) contribute to improving biosensors for medical applications? This question is addressed in the press release titled "Ultra-sensitive organic transistors: a breakthrough in biomarker detection," published with CNRS Chimie.

2024-2026 **Vulgarization events:** Committed to raising awareness among the non-specialist general public, I presented "The Soft Electronics of Tomorrow" at **Nerd Nite** events twice. I introduced the key concepts of organic electronics, highlighting the **societal relevance of this research**. Thanks to an interactive discourse that avoided

scientific jargon and the presentation of prototype solar cells, obtained in collaboration with the company ASCA (Germany), I was delighted to see the general public's curiosity ignite. Long, stimulating discussions followed.

Since 2023 Member of the "Communication teams" of (i) the ICPEES institute and (ii) the STELORG (Strasbourg Electronique Organique) consortium
